Materials List for Class

Sewing Machine

Basic sewing Supplies

Rotary Cutter, mat, ruler and small square (6 ½")

Fabric: when doing this method it is easier to work with good quality, tightly woven cotton. Don't bring junk. You won't need large quantities of anything, but a good assortment is essential. Fat quarters would be fine. The following is a list of recommended fabrics. Bring a variety of values and colors. Be bold in your fabric selection. This class goes outside the box, so let your fabrics go outside the box too.

Black solid, white solid, Batiks, hand dyes, solids

Geometric prints, polka dots, stripes, black and white prints

portable design wall (you can easily make one with two pieces of foam core board. Get enough flannel to go all the way around both boards. Sew it into a sleeve, insert one foam core board, sew along the foam core board down the middle of the flannel, insert the next foam core board and sew along the end of the flannel.)
